

We are pleased to invite you to

Wind Energy Projects in Brazil and the Northern-Germany experience

Those are some details you need to know

- Brazilian legal framework
- Legislative discussions
- Ongoing Projects
- Challenges to implement offshore wind projects
- Contractual layers in offshore wind
- Transfer of title offshore
- I/F in case of obstructions (wet storage, vessel funnel etc.)
- Commissioning, trials and taking over
- Load out procedures
- Adverse weather principles
- Rely upon data (e.g. soil, seabed)

**October 7th
2021**

**16h00 (CEST)
11h00 (BRT)**

**The link to the event
shall be provided upon
registration**

Speakers

Tobias Voigt

Managing Partner at Carneades Project Services

Since his admission to the bar in Germany more than 20 years ago, Tobias Voigt has been a competent lawyer who has accompanied complex engineering and construction projects worldwide in the areas of infrastructure, energy generation, mobility and process engineering, advising his clients in a wide variety of project phases, such as pre-construction tender procedures, construction execution, project transactions and dispute proceedings.

Alexandre Arlota

Partner, Mattos Filho

Specialist in structuring and developing greenfield and brownfield projects and related transactions for all infrastructure sectors including construction, energy, oil and gas, ports, airports, highways, railways, urban mobility, mining, maritime and offshore.

Marcia Vieira-Royle

Senior Contracts Manager

Marcia has over fifteen years of experience in Oil & Gas, Shipping and Wind Energy. In Offshore Wind, she has negotiated and drafted FIDIC contracts and sub-contracts, reviewed tender documentation, handled claims and variations and negotiated a wide range of offshore wind vessel charters (BIMCO), including offshore vessel refurbishment within the scope of cable transportation and installation packages as well as coordinating the interaction with inside and outside stakeholders.

Sofia Peres

Associate at Mattos Filho

Fully dedicated to the electricity sector since 2005 and has been involved in the most complex regulatory issues of the sector in the past years: administrative and judicial litigation regarding, extraordinary tariff revisions, bids for privatization of state-owned distribution companies, regulation of the Conta-covid, among others.

Moderator

Nilton Mattos

Partner, Mattos Filho

Focuses his practice on offshore mandates (being shipping, ports or oil & gas related). He is particularly experienced in transactions (share or assets), regulatory and contractual work. Capable of advising both on private and public law and has relevant experience in dispute resolution (especially international arbitrations).
